

AGILE PROJECT MANAGEMENT

DATE: 15-16 January 2019

VENUE: Phileo Damansara 1, Petaling Jaya

TRAINER: Mr. Mani Selvan @ Nyana Jothi

COURSE FEE

Early Bird: RM 1,750 per pax
(Registration by 14-Dec-18)

Normal Fee: RM 1,800 per pax

Group Discount: RM 1,500 per pax
(Minimum of 3 pax from the same organization)

COURSE OVERVIEW

In many industries, such as Information Technology, Product Development, and Manufacturing, project managers are often faced with complex projects that call for a great deal of vision, innovation and creativity — requiring a delicate balance of flexibility and compliance. **Agile project management** offers managers and leaders the skills, tools and techniques to effectively manage the planning, execution, and delivery of challenging projects in an Agile or hybrid environment.

In this program, participants will be introduced to the most popular agile frameworks, including SCRUM, and learn how they align with traditional *PMBOK*-based project management. They will learn the pros and cons of agile techniques, and how to manage the system and create the right environment for creative, self-organizing, self-managing teams to flourish.

WHO SHOULD ATTEND

- Associate Project Managers
- Project Managers
- IT Project Managers
- Project Coordinators
- Project Analysts
- Project Leaders
- Senior Project Managers
- Team Leaders
- Product Managers
- Program Managers

LEARNING OBJECTIVES

- The background to and the driving forces for taking an Agile approach to software and solutions development
- The core practices and philosophies behind a number of specific Agile methodologies
- How to apply a number of tools and techniques to develop the project community, from structuring and coordinating self-organizing teams to ensuring continuous feedback across all layers of the organization
- How to use Agile techniques to plan, track and monitor Agile projects, programs and portfolios
- The importance of value-driven delivery and continuous customer and user feedback in increasing team effectiveness
- How to apply a variety of Agile tools and techniques to provide a guidance and decision-making framework for self-organizing Agile teams to ensure their continuous alignment with organizational goals

COURSE OUTLINE

- Agile Methodologies, Practices and Principles
 - Comparison to Waterfall Practices and Principles
 - Why and Where can Agile Benefit Projects
 - Value Proposition for the Organization
 - Barriers and Challenges of using Agile
 - Overview of Agile Tools and Techniques
 - Agile and the *PMBOK*® *Guide* Framework
- Agile Team Roles & Responsibilities:
 - New Individual Roles with Familiar Responsibilities
 - ScrumMaster and Product Owners
 - Adapting to Change and Overcoming Resistance
 - Agile Team Structure
 - Managing Self-Organized / Self-Disciplined Teams
 - Communications in an Agile Environment
