

AGILE PROJECT MANAGEMENT

16 - 17 July 2019 • Phileo Damansara 1, Petaling Jaya

INTRODUCTION

In many industries, such as Information Technology, Product Development and Manufacturing, project managers are often faced with complex projects that call for a great deal of vision, innovation and creativity - requiring a delicate balance of flexibility and compliance. Agile project management offers managers and leaders the skills, tools and techniques to effectively manage the planning, execution and delivery of challenging projects in an Agile or hybrid environment.

In this program, participants will be introduced to the most popular agile frameworks, including SCRUM and learn how they align with traditional PMBOK-based project management. They will learn the pros and cons of agile techniques and how to manage the system and create the right environment for creative, self-organizing, self-managing teams to flourish.

COURSE OBJECTIVE

- The background to and the driving forces for taking an Agile approach to software and solution development.
- The core practices and philosophies behind a number of specific Agile methodologies.
- How to apply a number of tools and techniques to develop the project community, from structuring and coordinating self-organizing teams to ensuring continuous feedback across all layers of the organization.
- How to use Agile techniques to plan, track and monitor Agile projects, programs and portfolios.
- The importance of value-driven delivery and continuous customer and user feedback in increasing team effectiveness.
- How to apply a variety of Agile tools and techniques to provide a guidance and decision-making framework for self-organizing Agile teams to ensure their continuous alignment with organizational goals.

COURSE OUTLINE

Module 1: Agile Methodologies, Practices and Principles

- Comparison to Waterfall Practices and Principle
- Why and Where can Agile Benefit Projects
- Value Proposition for the Organization
- Barriers and Challenges of using Agile
 - Overview of Agile Tools and Techniques
