

PROJECT MANAGEMENT ESSENTIALS

28-30 May 2019 • Phileo Damansara 1, Petaling Jaya

INTRODUCTION

Major corporations are adopting A Guide to the Project Management Body of Knowledge (PMBOK® Guide) 6th Edition, from the Project Management Institute, and the related Project Management Professional (PMP) Certification, as the primary sources of competency in the field of Project Management.

This program was designed to provide project management processes awareness and knowledge in providing a follow through facilitation module with reference to the PROJECT MANAGEMENT PROCESS GROUPS namely Initiating, Planning, Executing, Monitoring and Control and Closing with respective Project Management Knowledge Areas based on PMI PMBOK Version 6.

This intensive 3 days training program focuses on how to maximize value for the project and organization by applying project management essentials. Most time is spent on the 20% of effort that delivers 80% of project value.

COURSE OBJECTIVE

- Develop and become aware of the importance of project management.
- Identify and manage resources.
- Use project management techniques and tools in managing and executing better projects.
- Generate project management tools such as work breakdown structures, project networks, Gantt charts, resource loading charts, budgets and risk management plans.
- Control projects more effectively by tracking progress, analyzing performance variances and defining corrective actions.

COURSE OUTLINE

Module 1: Foundations

- Formal vs. informal project management
- Project Management Institute (PMI) framework
- Project management life cycle

Module 2: Initiating

- Role of the project manager
- Project charter
- Stakeholder identification and assessment
- Progressive elaboration

Module 3: Planning

- Planning around project constraints
- SMART objectives
- Converting objectives into requirements
- Decomposition of requirements into a work breakdown structure
- Developing a work breakdown structure dictionary

- Principles of estimating time and cost
- Analyzing work and estimating duration of work packages
- Determining sequence of work packages
- Network diagramming and critical path analysis
- Budgeting resources and cost control
- Ensuring that all management responsibility areas are included in the project plan
- Analyzing risks for probability and impact
- Mitigating and planning risk contingencies
- Preparing baselines for scope, time, and cost
- Obtaining stakeholder sign-off

Module 4: Executing, Monitoring, and Controlling

- Team-building principles and priorities
- Status and performance reporting
- Management by exception
- Keeping stakeholders informed and involved
- Steering performance back to the baseline
- Integrated change controls

Module 5: Closing

- Transitioning the product or service
- Capturing lessons learned for the organization
- Final report to stakeholders
